

Res-Q-Rail®

Access to the scene of railway incidents is frequently restricted creating unnecessary delays in reaching and caring for the injured. The Res-Q-Rail® is designed to assist in such incidents by transporting essential equipment and supplies to the accident scene smoothly. Transfers casualties to waiting ambulances or away from the scene.

The benefits of Res-Q-Rail® include:

- Adjustable, quick assembly carrier for use on standard gauge railway tracks and electrified lines and comprises 2 beams, 2 poles and platform
- Eliminates the need to carry stretchers and casualties overlong distances through rough and difficult terrain
- Gets equipment to scene efficiently and effectively
- Can accommodate 3 x 11D stretchers
